DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, 41-58 (part of each), drawn to compounds of claim 1, their pharmaceutical compositions, and methods of treatment wherein said compounds have the following substituents:

R^1 and R^2 do not form a spacer group of $W=X=Y=Z$;

B is an optionally substituted cycloalkyl or phenyl group.

classified in class 546, subclasses 207, 216, etc.

- II. Claims 1, 33-40, and 46-58 (part of each), drawn to compounds of claim 1, their pharmaceutical compositions, and methods of treatment wherein said compounds have the following substituents:

R^1 and R^2 form a spacer group of $W=X-Y=Z$;

B is formula (V) with D^1 , D^2 , J^1 , J^2 and K^1 represent C;

classified in classes 544, 546, 548, and various subclasses. Further restriction and election of species will be required if this group is elected.

- III. Claims 1-32, and 41-58 (part of each), drawn to the remaining subject matter, classified in various class, various subclass. Further restriction and election of species will be required if this group is elected.

The inventions of groups I to III differ from each other because each group is drawn to a ring system that is distinct and patentable over each other. Essentially, these are three independent inventions as compounds of one group can be utilized alone, and not in combination of those in other groups. Note, with a variable core as such, the common property is not enough to keep three groups in the same Markush claim. Furthermore, a prior art that renders obvious one invention would not do so to the other. Thus, restriction for examination purpose as indicated is proper. However, should applicant traverse on the ground that the three groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the three groups to be obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the invention unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Kathryn J. Doty on 9-21-01 to request an oral election to the above restriction requirement, but a written restriction was requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1624

application. Any amendment of inventorship must be accompanied by a petition under 37

CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamthom N. Truong whose telephone number is 703-305-4485. The examiner can normally be reached on M-F (9:30-5:30).
